Enhanced Medicaid Features

The CMS Interoperability and Prior Authorization Final Rule, reduces administrative burdens and improves access to patient information. The rule promotes greater interoperability between providers and health plans by modernizing prior authorization and health data exchange processes, ultimately supporting a more efficient and patient-centered healthcare experience.

Benefits for Providers

- Improved access to patient data from participating health plans, supporting more informed clinical decision-making and better care coordination.
- Reduced administrative workload, allowing clinical and office staff to spend less time on paperwork and more time focused on patient care.
- Faster prior authorization decisions.
- Greater transparency from health plans, including visibility into prior authorization requirements, request status, and reasons for denials.
