1 Introduction

The Health Insurance Portability and Accountability Act (HIPAA) requires that Medicaid and all other health insurance payers in the United States, comply with the EDI standards for health care as established by the Secretary of Health Services. The ANSI X12N implementation guides have been established as the standards of compliance for claim transactions.

The following information is intended to serve only as a companion guide to the HIPAA ANSI X12N implementation guides. The use of this guide is solely for the purpose of clarification. The information describes specific requirements to be used for processing data. This companion guide supplements, but does not contradict any requirements in the X12N implementation guide. Additional companion guides/trading partner agreements will be developed for use with other HIPAA standards, as they become available.

Additional information on the Final Rule for Standards for Electronic Transactions can be found at <http://aspe.hhs.gov/admnsimp/final/txfin00.htm>. The HIPAA Implementation Guides can be accessed at http://www.wpc-edi.com/hipaa/HIPAA_40.asp.

1.1 Purpose

The 837 Professional Transaction is used to submit health care claims and encounter data to a payer for payment. This transaction is the only acceptable format for electronic professional claim submissions to the Commonwealth of Kentucky. The intent is to expedite the goal of achieving a totally electronic data interchange environment for health care encounter/claims processing, payment, corrections and reversals. This transaction will support the submission of professional claims, professional encounters, and Coordination of Benefits for Medicare Part B. The 837 Professional is the electronic correspondent to the paper CMS-1500 claim form; therefore, any claim types or encounter data submitted on the CMS-1500 form correlate to the 837 Professional, if data is submitted electronically.

All required segments within the 837 Professional Transaction Set must always be sent by the submitted and received by the payer. Optional information will be sent when it is necessary for processing. Segments that are conditional are only sent when special criteria are met. Although required segments in the incoming transaction may not be used during claims processing, some of these data elements will be returned in other transaction such as the Unsolicited Claim Status (277 Transaction Set) and the Remittance Advice (835 Transaction Set).

1.2 Special Considerations for 837 Professional Transaction

1. Subscriber, Insured = Member in the Kentucky Medicaid Eligibility Verification System

The Commonwealth of Kentucky Medicaid Eligibility Verification System does not allow for dependents to be enrolled under a primary subscriber, rather all enrollees/members are primary subscribers within each program or MCO (Managed Care Organization).

2. Provider Identification = Commonwealth of Kentucky Medicaid ID or NPI

The Commonwealth of Kentucky implementation date for NPI is scheduled for May 23, 2008.

As of May 23, 2008, KY Medicaid will not allow continued use of the *KyHealth Choices* provider IDs (atypical is exempt); only NPI is permitted on any inbound or outbound transaction.

3. Taxonomy

Billing Provider, taxonomy at Loop 2000A is required when the payer's adjudication is known to be impacted by the provider taxonomy code.

Rendering Provider, taxonomy at Loop 2310B applies to the entire claim unless overridden on the service line level at Loop 2420A.

4. Atypical Providers

Providers classified as an 'atypical provider' are excluded from NPI and taxonomy and will continue to use their legacy id after May 23, 2008. The following provider types are considered Atypical Providers:

- Hands
- Non-emergency Transportation
- Commission for Handicapped Children
- Title V/DSS
- First Steps
- Impact Plus

5. Logical File Structure

There can be only one interchange (ISE/IEA) per logical file. The interchange can contain multiple functional groups (GS/GE) however; the functional groups must be the same type.

6. Submitter

Submissions by non-approved trading partners will be rejected.

7. Claims and Encounters

Claims and encounters must be submitted in separate ISA/IEA envelopes.

8. Response/997 Acknowledgement

A response transaction will be returned to the trading partner that is present within the ISA06 data element.

Commonwealth of Kentucky will provide a 997 Acknowledgment for all transactions that are received.

You will receive this acknowledgment within 48 hours unless there are unforeseen technical difficulties. If the transaction submitted was translated without errors for a request type transaction, i.e. 270 or 276, you will receive the appropriate response transaction generated from the request. If the transaction submitted was a claim transaction, i.e. 837, you will receive either the 835 or the unsolicited 277.

NOTE The 835 and unsolicited are only provided weekly.

9. Claims Allowed per Transaction (ST/SE envelope)

The HIPAA implementation guide states on the CLM (Claim Information) segment that the developers recommend that trading partners limit the size of the transaction (ST/SE) envelope to a maximum of 5,000 CLM segments.

Commonwealth of Kentucky does not have a maximum for the number of claims per transaction (ST/SE envelope).

10. Document Level

Commonwealth of Kentucky processes files at the claim level. It is possible based on where the error(s) occur within the hierarchical structure that some claims may pass compliance and others will fail compliance. Those claims that pass compliance will be processed within the Medicaid Management Information System (MMIS). Those claims that fail compliance will be reported on the 997.

11. Dependent Loop

For Commonwealth of Kentucky, the subscriber is always the same as the patient (dependent). Claims containing data in the Patient Hierarchical Level (2000C loop) may not process correctly.

12. Compliance Checking

Inbound 837 transactions are validated through Strategic National Implementation Process (SNIP) Level 4. In addition to Level 4, Level 7 patient (dependent) level will occur if 2000C patient loop is received. All other levels will be validated within the MMIS.

13. Identification of TPL

For each claim at the header level, if loop 2320 (Other Subscriber Information) is present and SBR09 (Claim Filing Indicator) is not equal to Medicare, the COB Payer Paid Amounts (AMT01=D) received in the 2320 loop(s) will be summed together for the Payer Paid Amount.

NOTE The 2320 loop can repeat multiple times per claim.

2 CONTROL SEGMENT DEFINITIONS FOR KENTUCKY MEDICAID 837 PROFESSIONAL TRANSACTION

X12N EDI Control Segments

- ISA – Interchange Control Header Segment
- IEA – Interchange Control Trailer Segment
- GS – Functional Group Header Segment
- GE – Functional Group Trailer Segment
- ST – Transaction Set Header
- SE – Transaction Set Trailer
- TA1 – Interchange Acknowledgement

2.1 ISA - Interchange Control Header Segment

Communications transport protocol interchange control header segment. This segment within the X12N implementation guide identifies the start of an interchange of zero or more functional groups and interchange-related control segments. This segment may be thought of traditionally as the file header record.

2.2 IEA - Interchange Control Trailer

Communications transport protocol interchange control trailer segment. This segment within the X12N implementation guide defines the end of an interchange of zero or more functional groups and interchange-related control segments. This segment may be thought of traditionally as the file trailer record.

2.3 GS – Functional Group Header

Communications transport protocol functional group header segment. This segment within the X12N implementation guide indicates the beginning of a functional group and provides control information concerning the batch of transactions. This segment may be thought of traditionally as the batch header record.

2.4 GE – Functional Group Trailer

Communications transport protocol functional group trailer segment. This segment within the X12N implementation guide indicates the end of a functional group and provides control information concerning the batch of transactions. This segment may be thought of traditionally as the batch trailer record.

2.5 ST – Transaction Set Header

Communications transport protocol transaction set header segment. This segment within the X12N implementation guide indicates the start of the transaction set and assigns a control number to the transaction. This segment may be thought of traditionally as the claim header record.

2.6 SE – Transaction Set Trailer

Communications transport protocol transaction set trailer. This segment within the X12N implementation guide indicates the end of the transaction set and provides the count of transmitted segments (including the beginning (ST) and ending (SE) segments). This segment may be thought of traditionally as the claim trailer record.

572	N/A	SE	SE02 – Transaction Set Control Number	Must be identical to the value in ST02

2.7 TA1 – Interchange Acknowledgement

The TA1 Acknowledgement is a means of replying to an interchange or transmission that has been sent. The TA1 verifies the envelopes only. The TA1 is a single segment and is unique in the sense that this single segment is transmitted without the GS/GE envelope structure. The TA1 segment provides the capability for the receiving trading partner to notify the sending trading partner of problems that were encountered in the interchange control structure.

NOTE: For Provider types 31 and 35, enter the pay-to provider number in this loop, 2010AA.</p>				

Billing Provider Using NPI

This mapping format is used when the Billing Provider is a Healthcare provider. NPI is required for all Healthcare providers. Billing Provider at Loop 2000A is required when the payer's adjudication is known to be impacted by the billing provider taxonomy code. The Rendering Individual Provider Information should be entered in 2310B or 2420A.

NOTE: For Provider types 31 and 35, enter the pay-to provider information in this loop, 2010AA.

4 PROGRAM SPECIFIC REQUIRED INFORMATION FOR KENTUCKY MEDICAID PROFESSIONAL CLAIMS PROCESSING

1. Transportation Providers must enter the required information in loop 2400 NTE02 data element (Previously billed in the 2300 NTE02):
 - Time of Pickup (Format is HHMM) Must be preceded by a qualifier of PT, (PTHMM)
 - Location of Pickup and Destination Code within the new MMIS will be billed as a modifier. (Please see Transportation Billing Manual for valid Modifiers)
2. Preventive Care Providers who bill claims that require a seven position school ID must enter that number in loop 2400, NTE02 data element (Previously billed in the 2300 NTE02):
 - School Location Identifier: 7 position value must be preceded by a qualifier of ST, (STxxxxxx)
3. All Providers billing Early Periodic Screening, Diagnosis and Treatment Procedures (EPSDT) must use disposition codes when abnormal conditions are found. Please refer to the Billing Instructions for the applicable disposition codes. The disposition codes must be placed in loop 2400 NTE02 data element:
 - Disposition Code: Each disposition code must be a length of 2. Up to 3 occurrences can be billed. Must be preceded by a qualifier of DC, (DCxxxxx)
4. School-Based Health Service Providers who bill claims that require Number of Students or Number of Students and 3 position Employee ID must enter those values in loop 2400, NTE02 data element. If Number of Students and Employee ID are submitted each value must be preceded by the appropriate qualifier and separated with a comma (.). If only sending Number of Students or Employee ID do not send the comma (,) after the data. Local modifier codes were also billed with the number of students for dates of service prior to 10/16/03.
